

NEW DOCK DESIGN OPTIONS

Design your perfect waterfront.

Your dock should match your home, your shoreline and the way you use the water. This guide walks through every finish and add-on available on a new Blue Ridge dock, so you can pick the combination that makes it yours.

01 **Decking**
Four stamped concrete paver patterns

02 **Roof**
21 metal roof colors

03 **Fascia**
Three composite trim colors

04 **Accessories**
Ladders, boat lifts, benches and more

Questions about an option? Your Blue Ridge Boat Docks salesperson is happy to help.

01 DECKING

Concrete Paver Decking

Our 2' x 2' precast concrete pavers give you a finished, stone-look deck that never needs staining or sealing. Choose one of four stamped patterns.

CHOOSE YOUR PATTERN

Slate
Natural, rugged stone texture

Cobblestone
Classic old-world look

Large Diamond
Bold, geometric lines

Small Diamond
Refined, slip-resistant texture

WHY CONCRETE PAVERS

Maintenance-free
No staining, sealing or replacing rotted boards. An occasional wash keeps them looking new.

Cool underfoot
Stays comfortable for bare feet on hot summer days, unlike dark wood or composite.

Safe and smooth
No splinters, protruding nails or rusty screws. Pavers sit directly on top of the dock frame, secured with heavy-duty adhesive.

Built for the water
Reinforced concrete that stands up to constant moisture, sun and heavy foot traffic.

MATERIAL	SIZE	FINISH	INSTALL
Reinforced precast concrete	2' x 2' pavers	Integral color and texture	Set on the frame with adhesive

02 ROOF

Metal Roof Colors

Our dock roofs use heavy-duty PBR metal panels, built for sun, rain and wind on the water. 26-gauge is standard, with 24- and 22-gauge available, and painted finishes carry a manufacturer paint warranty against peeling, cracking and fading.

WHITES AND NEUTRALS

- Polar White
- High Gloss White
- Bright White
- White
- Light Stone
- Desert Sand
- Saddle Tan

GRAYS AND DARKS

- Ash Gray
- Charcoal Gray
- Deep Gray
- Burnished Slate
- Coffee Brown
- True Black

METALLIC

- Copper Metallic

BLUES, GREENS AND REDS

- Hawaiian Blue
- Cobalt Blue
- Evergreen
- Ivy Green
- Scarlet Red
- Rustic Red
- Wine Red

See it in person before you decide. Printed and on-screen colors are approximate. We recommend making your final selection from physical metal color chips, which your salesperson can provide.

Long life

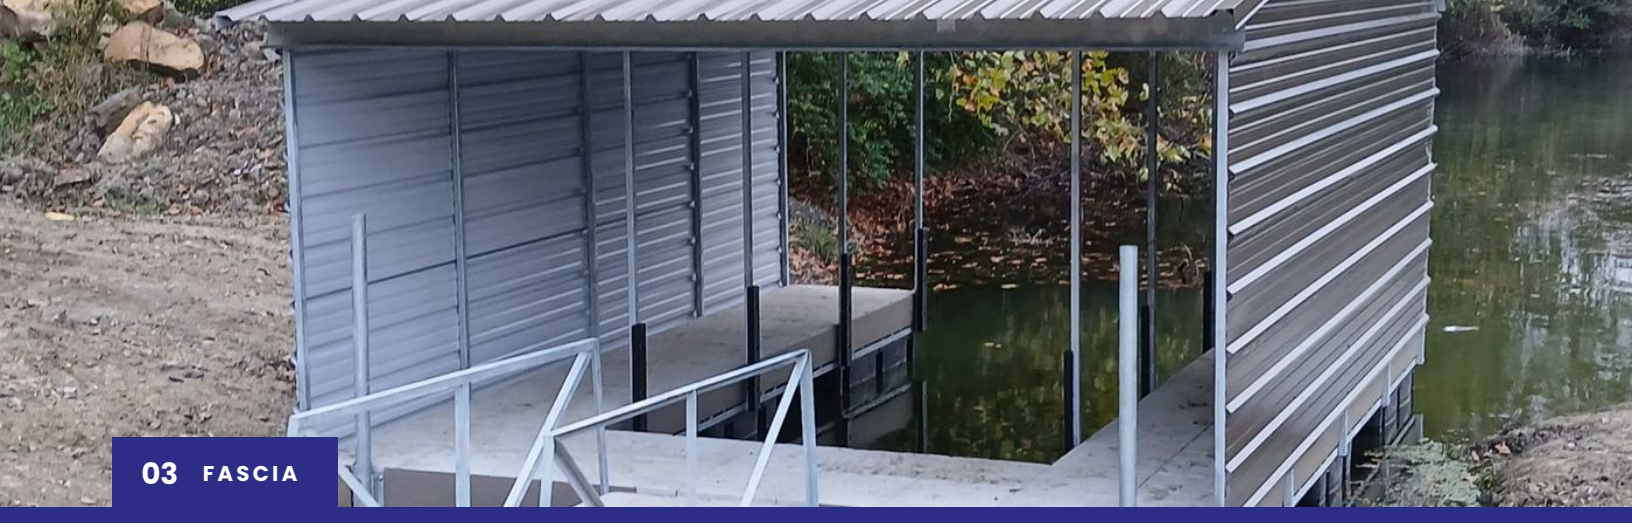

Metal panels far outlast shingle roofing over the water.

Serious strength

Purlin-bearing panels designed for severe waterfront weather.

Low maintenance

Resists the elements with minimal upkeep, year after year.

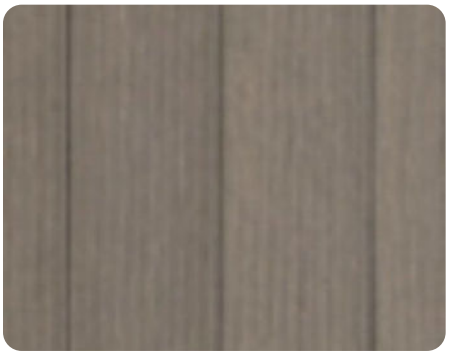

03 FASCIA

Composite Fascia Colors

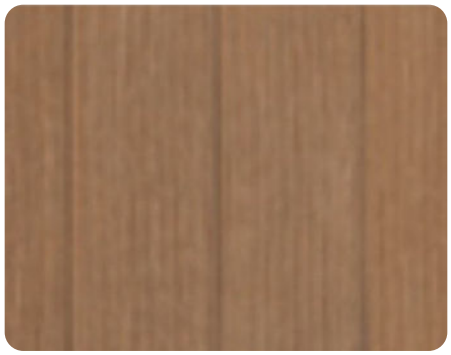

Fascia is the trim that wraps the frame of your dock and gives it a clean, finished look. We use UltraDeck Rustic composite cladding: a wood-look board that never needs staining or painting and resists rot, splinters and decay. Three colors are included in our standard package.

CHOOSE YOUR COLOR

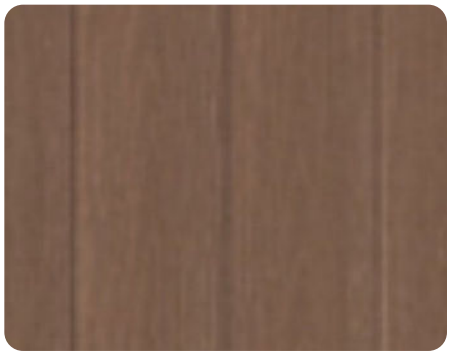

Gray

A weathered driftwood tone. This modern neutral hides water spots and pairs well with silver hardware and stone shorelines.

Cedar

A warm, classic golden brown that mimics fresh-cut cedar and gives the dock a bright, inviting look.

Hickory

A deep, rich brown. A bold, high-contrast look that hides dirt and debris exceptionally well.

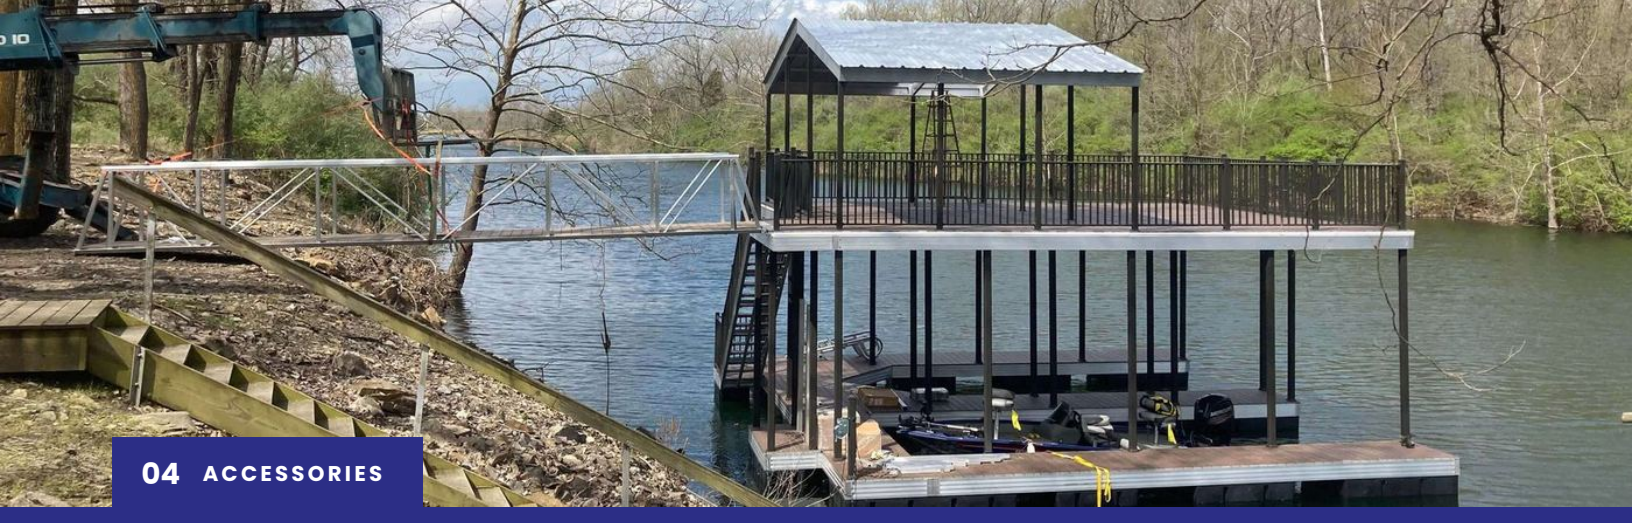

TIPS FOR CHOOSING

Frame the deck
A darker fascia like Hickory creates a "picture frame" border around light-colored decking.

Think about sun
Darker colors hold a little more heat in direct sunlight. Gray and Cedar stay slightly cooler.

Match the setting
Hickory and Cedar blend into wooded lots. Gray is popular on open water and rocky shorelines.

Additional fascia options are available and may carry an added cost. Ask your salesperson for details.

Optional Accessories

Finish your dock with the add-ons that fit how you use the water. Any of these can be included with your new dock.

WetSteps Ladders

Wide-step aluminum dock ladders in 5- or 6-step models. Choose mill finish or a painted color finish.

Boat Lifts

Side mount, front mount and shallow water lifts, set up for V-bottom, pontoon or tritoon boats.

Dock Benches

Built in our shop: composite seat and back on galvanized steel, mounted to the dock edge. 1 to 4 seats (2' to 8' wide).

MORE WAYS TO OUTFIT YOUR DOCK

PWC ports and lifts

Drive-on PWC ports in 5' and 6' widths, in grey, dark grey, tan, blue or black, plus single PWC lifts and PWC platform lifts.

Swim and play

EZ Board steps and EZ Rail, high dive, swim-up bar, toy holder and fish cleaning station, in mill or painted finish.

Kayak launch

A floating kayak port with grab bar and handles for easy, stable launching.

Post-mounted storage

Flag holder, life vest rack, tube storage, hose holder, paddle board cradles and cleats that mount to your dock posts.
